2.2. Критерии оценивания результатов освоения дисциплины на различных этапах их достижения по видам оценочных средств

Балльно-рейтинговая система является базовой системой оценивания сформированности компетенций обучающихся.

Итоговая оценка сформированности компетенций обучающихся в рамках балльно-рейтинговой системы осуществляется в ходе текущего контроля успеваемости, промежуточной аттестации и определяется как сумма баллов, полученных обучающимися в результате прохождения всех форм контроля.

Оценка сформированности компетенций по дисциплине складывается из двух составляющих:

✓ первая составляющая – оценка преподавателем сформированности компетенций в течение семестра в ходе текущего контроля успеваемости (максимум 100 баллов). Структура первой составляющей определяется технологической картой дисциплины, которая в начале семестра доводится до сведения обучающихся;

✓ вторая составляющая – оценка сформированности компетенций обучающихся на зачете с оценкой (максимум – 20 баллов).

<i>Пятибалльная шкала</i>	«отлично»	«хорошо»	«удовлетворительно»	«неудовлетворительно»

Generation Gap: Reality or a Psychological Prejudice

To my mind generation gap is rather reality than a psychological prejudice. It has always been a topical problem and it still remains urgent nowadays. So what does a generation gap mean? It is a popular term used to describe big differences between people of a younger generation and their elders. This can be defined as occurring 'when older and younger people do not understand each other because of their different experiences, opinions, habits and behavior'. The term first came into prominence in Western countries during the 1960s, and described the cultural differences between the Baby Boomers and their parents. Although some generational differences have existed throughout history, during this era differences between the two generations grew significantly in comparison to previous times, particularly with respect to such matters as musical tastes, fashion, drug use, culture and politics.

Nowadays you will hardly find a boy or a girl satisfied with their parents. Neither will you find a grown-up, a parent not grumbling over 'younger generation' of their children. Pop music, ultra-modern clothes, noisy parties and children's wish to have more freedom become a stumbling-block on the way of mutual understanding between adults and their offspring and help foster differences between parents and teenagers. So it seems that in most families parents don't understand their children and children don't understand their parents.

According to the older generation teenagers are lazy, carefree, ungrateful, impolite and rude. They wear ridiculous clothes, listen to awful music and all they think about is parties, dates, friends and entertainment. Teenagers have very little responsibility and very few problems. But is it really so? If we look inside the mind of a teenager, we will see a very different picture. Teenagers are greatly worried about a great number of things: their appearance, relations with friends, parents and teachers, the way other people (especially their peers) treat them. They suffer from pimples, bullies, problems at school, misunderstanding with their boyfriend/girlfriend, lack of self-confidence, etc. Teenagers often don't know what they are good at and their future seems to be rather vague. Every day they face a lot of stressful situations and feel depressed. Besides they have constant pressure from betters and elders as to how they should act, behave, look and feel.

There are a lot of books and films devoted to the problem of the generation gap. One of such films is 'Freaky Friday' (2003). The wide generation gap between Tess Coleman (Jamie Lee Curtis) and her teenage daughter Anna (Lindsay Lohan) is more than evident. They simply cannot understand each other's preferences. They have absolutely different views on clothes, hair, music, duties and even people. On a Friday morning the mother and the daughter switch bodies. As they adjust with their new personalities, they begin to understand each other more and eventually they gain respect for the other's point of view. It is 'selfless love' that changes them back.

But of course there is no magic in real life, that's why there should be some other way to bridge the gap between parents and their children. To my mind communication is the best way to solve the problem. The more time adults and children spend together, the more they talk and discuss different things the better they understand each other. It is very important to be selfless and open-minded, patient and sincere. Despite the great changes in the electronic and technological environment in the last several decades, a defined gap does not separate today's generations as it did in the sixties and seventies. So the 'generation gap' can disappear. If we are a little wiser, children will find a key to the heart of their parents and vice versa.

1. Complete each sentence (A—H) with one of the endings (1—8):

- G. The more time adults and children spend together, the more they talk and discuss different things.

4. a defined gap does not separate today's generations as it did in the sixties and seventies.

3. Answer the questions

- 1) Why do generational differences exist?
- 2) How can you describe a typical teenager/grown-up?
- 3) What problems do teenagers usually face?
- 4) What books and films devoted to the problem of the generation gap do you know?
- 5) What are the ways to bridge the gap between parents and children?
- 6) Does a defined gap separate today's generations? Why?
- 7) How can you characterize your relationships with your parents and grandparents? Do you understand each other's opinions, habits, behavior and preferences?
- 8) Do you agree that children's job is 'to try their wings' and parents' job is 'to let them fly away'? Comment on your answer.

4. Read the letters written by the teens who have problems with their parents. Give them some tips

Kathie, 16.

My parents don't understand me! 'They treat me as if I were a kid though I am already 16! I want to go clubbing and bowling, I want to meet my friends and go to different parties. 'But they tell me to think more about school and my studies. 'When I go somewhere I have to be at home not later than 10 PM. It's ridiculous and all my friends laugh at me. My father almost had a stroke when he learnt that I had a boyfriend. How can I make them understand that I'm not a child anymore?

Ben, 15.

My classmates bully me. I don't know why. Maybe because I'm shy and a bit fat or wear spectacles. I told my parents about my problem but they said it was quite all right and that I had to patch things up myself. They seem to be absolutely indifferent to what's going on in my life. They don't care about what I feel or what I want. I'd like to become a com-

puter programmer, but he says I must become a lawyer. But what about my dreams? I'm torn between wanting to take a stand, and not wanting to upset my parents. Nelly, 14.

My parents are too harden me. 'We have great difficulties with understanding each other. Every day I hear "Don't listen to this music', 'Don't talk to this girl - she is spoilt', 'Don't invite your friends' ... Sometimes I feel irritated and we quarrel. I'm really tired of such a don't-do-it way of upbringing. My parents are convinced that everything I do is wrong. T)o I really deserve such an attitude?

5. Read the quotations below. Choose any statement and comment on it

- 'The lessons of the past are ignored and obliterated in a contemporary antagonism known as the generation gap.' (Spiro T. Agnew)

- 'Parents often talk about the younger generation as if they didn't have anything to do with it.' (Haim Ginott)

- 'Every generation needs a new revolution.' (Thomas Jefferson)

'Trouble is, kids feel they have to shock their elders and each generation grows up into something harder to shock.' (Ben Lindsey)

'Every generation revolts against its fathers and makes friends with its grandfathers.' (Lewis Mumford)

'Each generation imagines itself to be more intelligent than the one that went before it, and wiser than the one that comes after it.' (George Orwell)

'Each generation goes further than the generation preceding it because it stands on the shoulders of that generation.' (Ronald Reagan)

Look at the picture by Bidstrupp. What can you say about the artist's understanding of the problem of the generation gap? The words and word combinations in brackets can help you. (a topical problem, to remain urgent, to exist throughout history, to grumble over younger generation, a stumbling-block, generational differences, to have different views on smth, to bridge the gap, the lessons of the past, to shock parents, to be at war with elders, to revolt against, to make the same mistakes)

A. Give the definition of generation gap.

B. Read the text 'Generation Gap: Reality or a Psychological Prejudice'. Comment on the title of the text.

Read the article and choose the correct option for questions below.

The famous Trans-Siberian railway line goes from Moscow to Vladivostok, but there's another railway line about 650 kilometres north of the Trans-Siberian. This is the Baikal-Amur Mainline (BAM). A special train, the Matvei Mudrov medical train, travels along its

4,000 kilometres. There are usually between twelve and fifteen doctors on the train. The train stops for a day at places along the BAM. The people who live in small towns and villages come to the train for medical attention. There are no doctors or hospitals in their towns or villages. For these patients, their health centre is on the train.

The Matvei Mudrov was named after a Russian doctor in the nineteenth century. Nowadays, the Matvei Mudrov visits each town or village on the BAM twice a year. In the village of Khani (population 742), the patients include a man with two broken ankles and a teenage girl. She had appendicitis a month ago and she was lucky to travel to a town three hours away for an operation. The Matvei Mudrov doesn't have any equipment to do operations. The doctors can diagnose their patients' medical problems and recommend treatment and medicines. The train has a laboratory for blood and urine tests and a number of medical testing machines. The patients like the doctors on the train. They say they are honest and good at their jobs.

Next stop is a town called Berkakit. About 4,000 people live here. There is a queue to see the doctors. Mikhail Zdanovich is waiting for his turn. He's 61 years old and he came to Berkakit in 1976. At the time, only about a hundred young people lived in Berkakit. It was a new town. Zdanovich met a woman who worked at the town bakery. They married and stayed in the town. When Zdanovich walks into the doctor's office she says 'Oh, Mikhail, I recognised your voice.' He has a problem in his shoulder. The doctor writes a letter to say that he can't work, he must have an operation. He leaves, happy, and then he returns a few minutes later. He brings freshly cooked pies and some goat's milk.

For the people who live in this remote part of Russia, the Matvei Mudrov is more than a medical train. It's a social connection to the community of their country.

Read the text. Put the events below in order.

Heat, cold, mountains, deserts, illness, and animals. All of these were possible dangers when Nick Bourne decided to run from one end of Africa to the other - a journey that many people thought was impossible.

Bourne began his run in northern Egypt in October 1997. His adventure nearly ended 500 miles later while he was waiting to cross the Sudanese border - the Egyptian military stopped him and refused to let him leave the country.

Eventually, he flew to Cape Town and started again on 21 January 1998. Every day he got up at 3.30 a.m., ate a breakfast of cereal, and started running. After 20 miles he stopped for a rest and had a pasta lunch, before running another 20 miles. He drank up to 15 litres of liquid a day.

He had some incredible experiences. He was crossing the Kalahari Desert in temperatures of 62°C when he came face to face with a giant cobra. In Zambia his heartbeat went up from 135 a minute to over 190, and his doctor found that he had malaria. He saw lions and ran through a herd of elephants, and a swarm of bees attacked him while he was running through Tanzania. He celebrated his 28th birthday with a chocolate cake in the shadow of Kilimanjaro.

After eleven months and 6,021 miles he arrived at the Pyramids and finished perhaps the most amazing run ever.

The Hub

Sometimes, you fly not to your destination, but to a 'hub'. In other words, you fly to an airport to catch a plane to fly to another airport. You are in transit. You sit in a big room where all the seats are facing in the same direction, like the seats in a theatre. But there is no show. There is nothing.

You begin to feel ill. You do not know what time it is. In many airports, each terminal is the same as every other terminal. The corridors are the same as each other. But gate 36 may be hundreds of metres from gate 35, in any direction; it's easy to make a mistake.

I was once at Zurich airport. The weather was bad and the plane was delayed. I was drinking coffee at a bar and reading a book. Outside, the weather had got worse. Time passed. When the flight was called, I picked up my bags and moved towards the gate. I went down a corridor, down some steps, along a bit, down a bit. Then, just as I got to the gate, I realized I had left my book in the bar.

I tried to remember the route I had taken so I could do it in reverse. I was successful. The book was still there.

Then I started running back. I ran down staircases, along corridors. I ran past a shop selling magazines. At some point, I knew that I had taken the wrong turn. At another point, I panicked.

11. You land at a 'hub' to catch another plane.

12. It is easy to go to the wrong gate.

13. The man realized he had forgotten his book when he got on the plane.

14. When he went back, he couldn't find the book.

15. He got lost in the airport.

The Yeoman Warders were formed by King Henry VIII. In 1509 the King decided to leave twelve of his old and sick Yeomen of the Guard in the Tower of London to protect it. Their main duty was to look after the Tower prisoners, and safeguard the British crown jewels.

Nowadays there are still twelve Yeomen Warders at work every day. (All in all, there are 35 of them). They are still nicknamed "Beefeaters" but their duties have certainly changed. They act as tour guides and raven-keepers. They carefully look after the famous ravens,

feed them and cut their wings. There is a legend that the Tower will fall if the ravens fly away. The Beefeater's most famous duty is to take part in the night ceremony of passing the Tower Keys. For everyday duties Yeomen Warders wear a red and dark blue uniform with a round hat, while on holidays they wear a state dress uniform which is red and gold, the same as the Yeomen of the Guard, but without a cross belt. In these uniforms the Beefeaters can be called one of the most interesting sights of London.

The historical center of London is now a relatively small area still known as the City, which covers only about 1 sq mile. Most of the financial activities are crowded along Threadneedle Street, near the intersection known as the Bank, which includes the huge Bank of England complex, the Royal Exchange, and the Stock Exchange. The permanent residential population of the City is now less than 6000, but about 350,000 commute here daily to work.

B.

Located just west of Soho and Covent Garden in the West End is a more residential area. The relatively dense development of this area is broken up by a series of Royal Parks, areas once owned by the Crown, including Hyde Park, Kensington Gardens, and Regent's Park.

C.

The most prominent landmark of the City is Saint Paul's Cathedral, designed by the English architect Christopher Wren to replace the original church, which was destroyed during the Great Fire of London in 1666.

D.

Some of the City's traditional functions have disappeared. The newspaper industry was concentrated in the Fleet Street area for centuries, but during the 1980s the Times and other papers moved to highly automated quarters at the Docklands in the East End. The old wholesale fish market, Billingsgate, located for centuries on the river between the Tower and London Bridge, also moved to the Docklands.

E.

The City of Westminster, about two miles upstream from the city of London, emerged as England's political and religious centre of power after the 11th century. At the heart of Westminster is Westminster Abbey, begun by Edward the Confessor in the 11th century and rebuilt in the 13th century. It has always been closely associated with the monarchy and is used for such state occasions as coronations and royal funerals. It is also a giant mausoleum, and more than 3000 notable people are buried there. Statues and monuments line the magnificent nave.

F.

Virtually across the street are the Houses of Parliament, officially called the New Palace of Westminster. Farther west is the monarch's permanent residence in London, Buckingham Palace.

G.

To the west and north of Trafalgar Square is the West End, which is usually regarded as the centre of town because it is London's shopping and entertainment hub. The busiest shopping area is Oxford Street, where such large department stores as Selfridges, John Lewis, and Marks and Spencer are located. Other well-known shopping areas include Knightsbridge, the location of Harrods department store; and Piccadilly, where Fortnum and Mason specializes in fine food.

The water in the lake is so clear that if you drop a coin, it can be clearly seen a hundred feet below the water.

According to them, the water from Lake Baikal can cure different illnesses, gives you strength and clears your mind. The story about the meteorite has, however, never been proved by scientists.

C. The lake has also become famous for its unique fish and birds that are not found in other waters. The lake is home to more than 1000 animal species. Among them there are the world's only freshwater seals. There's no evidence of how the seals got to the lake, but they obviously enjoy their life there. D. Though Lake Baikal is located in a very remote place, and is difficult to reach in autumn and winter, it attracts thousands of visitors every year. A chance to see this unique place is worth the long journey! On the banks of Lake Baikal, you can stay in a modern, comfortable hotel, take part in hiking tours and enjoy the untouched natural beauty. People who have visited Lake Baikal once want to return to the place again and again.

E. However, the growing popularity of the lake and the industrial development of the region have caused ecological problems. The safety of this unique natural ecosystem has been discussed at an international level. Now Lake Baikal is on the list of heritage sites protected by UNESCO. A federal state law about the conservation of the lake was also supported in Russia.

F. The lake attracts not only tourists but also many wildlife researchers, biologists and even archaeologists. The world-famous explorer and scientist, Jacques Cousteau, and his team spent lots of time studying the deep waters of Lake Baikal. They also shot a film about their research that was broadcast by major TV channels all over the world.

G. Everyone considers the Siberian climate very severe, which is perfectly true for the Baikal region. The winters there are really freezing - the average temperature is as low as -25 degrees Celsius. Due to its location in the middle of the continent, the place is characterized by a sharp contrast between winter and summer temperatures. The summers are generally cool, with a few hot days. The sun shines brightly above the lake till late autumn.

Many people in GB think more about their health. They eat a lot of low-fat food and more fibre. People believe that they should exercise and going in for sport more not to be fat. Smoking, drinking, drugs are very bad for your health not only for children but adults too. But everything is not so good. Many teenagers eat only chips, pizza, crisps and cola a lot. They do not get enough iron, which is necessary for healthy muscles and for some reactions in the brain.

Islands of Micronesia

Located in the western part of the Pacific Ocean, the Federated States of Micronesia is made up of over 600 islands. These islands are divided into four states called Yap, Chuuk, Pohnpei and Kosrae. Although the total land mass of these islands is small, they are spread out over a very large area of the Pacific. If measured, this area would be five times as large as France.

The island of Yap is known for its distinctive culture and visiting it is a unique experience. It has many ancient traditions and legends. These legends are often passed on through generations through dance, which is seen as a way of entertaining as well as recording history. Both men and women learn the traditions of dancing from a young age. Visitors to this island come to learn something of the culture or to dive. The clear waters that surround the island are perfect for anyone wishing to study marine life, and for those wanting to see a manta ray this is perhaps the best place in the world. Perhaps this is why it has become such a popular diving destination.

Inhabitants of Chuuk enjoy a very relaxed pace of life and live off the sea and land. People here, as on the other Micronesian islands, live close to nature. Visitors to the atoll of Chuuk are often attracted by the superb shipwreck diving it offers. There are over 50 shipwrecked vessels for divers to explore, each home to a variety of sea life and even now, it is possible to find historic artefacts when diving among them.

Pohnpei is both the highest and biggest island in Micronesia. With a high level of rainfall each year, it is home to lush green rainforest and amazing waterfalls. This island is popular with travellers who love nature, hiking and exploring. As with the other Micronesian islands, the sea around the island is clear and full of marine life, perfect for diving and fishing.

Situated only a few hours away from Hawaii, Kosrae is home to peace-loving islanders who are known for their singing, chanting and traditional skills. It is famous for its perfectly clean, clear waters and its untouched reef. Home to over 180 different types of corals and more than 250 species of fish and marine wildlife, it is another excellent place to go diving and the sea is highly respected by the islanders who survive through fishing and farming.

But if you want to visit Micronesia, perhaps you will need to take your time. There are still plenty of other islands to explore.

Варианты ответов

Micronesia consists of nearly 600 different islands located in the Pacific Ocean. The islands are spread out and cover an area five times the size of France. On Yap, history is told through dance and passed down through generations. If you want to see manta ray, the waters around Yap offer the best opportunity. Divers often find artefacts when diving among the wrecks off Yap. As a result of heavy rainfall, there are some spectacular waterfalls on Pohnpei. More than 250 types of coral have been found in the waters off of Kosrea. Kosreans are not noted for their traditional heritage.

The heart of Moscow is Red Square. And the heart of Red Square is the Kremlin. The first wooden Kremlin was built by Prince Yuri Dolgoruky, then it was rebuilt in the reigns of Ivan Kalita, Dmitri Donskoy and Ivan III. By the end of the 15th century new brick walls completed the construction of the present Kremlin with its beautiful red walls and towers crowned with ruby stars. The Spasskaya Tower is the symbol of the Kremlin. It was built in 1491 and is 71 metres high. The tallest Trinity Tower, the Kutafia Tower, the Tower of the Senate, the St. Nicholas Tower are unforgettable for everyone. Near the Kremlin you can see Pokrovsky Cathedral which is also known by its folk name- the Vasili Blazhenny Cathedral. It was built at the end of the 16th century by architects Barma and Posnik in memory of Russia's conquest of the Kazan Kingdom in 1552.

In front of this ancient Cathedral you can see a monument to Minin and Pozharsky. It was designed by I. Martos in 1818 to commemorate the Russian victory over the Poles in 1612.

In the middle of Red Square there was a special place of execution- Lobnoye Mesto. There are some other places to see in Red Square. They are Mausoleum, the State History Museum, the Great Kremlin Palace with its armoury and Granovitaya Palata, the Bell Tower of Ivan the Great, Annunciation and Archangelsky Cathedrals and some others.

Задание 1. Прочитайте и переведите текст

Metals are materials most widely used in industry because of their properties. The study of the production and properties of metals is known as metallurgy.

The separation between the atoms in metals is small, so most metals are dense. The atoms are arranged regularly and can slide over each other. That is why metals are malleable (can be deformed and bent without fracture) and ductile (can be drawn into wire). Metals vary greatly in their properties. For example, lead is soft and can be bent by hand, while iron can only be worked by hammering at red heat.

The regular arrangement of atoms in metals gives them a crystalline structure. Irregular crystals are called grains. The properties of the metals depend on the size, shape, orientation, and composition of these grains. In general, a metal with small grains will be harder and stronger than one with coarse grains.

Heat treatment controls the nature of the grains and their size in the metal. Small amounts of other metals (less than 1 per cent) are often added to a pure metal. This is called alloying (легирование) and it changes the grain structure and properties of metals.

All metals can be formed by drawing, rolling, hammering and extrusion, but some require hot-working. Metals are subject to metal fatigue and to creep (the slow increase in length under stress) causing deformation and failure. Both effects are taken into account by engineers when designing, for example, airplanes, gas-turbines, and pressure vessels for high-temperature chemical processes. Metals can be worked using machine-tools.

The ways of working a metal depend on its properties. Many metals can be melted and cast in moulds, but special conditions are required for metals that react with air.

**Задание 2. Прочитать текст «Сварка» и ответить на вопрос:
WELDING**

Welding is a process when metal parts are joined together by the application of heat, pressure, or a combination of both. The processes of welding can be divided into two main groups:

- pressure welding, when the weld is achieved by pressure and
- heat welding, when the weld is achieved by heat

Heat welding is the most common welding process used today.

Nowadays welding is used instead of bolting and riveting in the construction of many types of structures* including bridges, buildings, and ships. It is also a basic process in the manufacture of machinery and in the motor and aircraft industries. It is necessary almost in all productions where metals are used.

The welding process depends greatly on the properties of the metals, the purpose of their application and the available equipment. Welding processes are: classified according to the sources of heat and pressure used: gas welding, arc welding, and resistance welding. Other joining processes are laser welding, and electron-beam welding.

Ответить на вопрос:

What is a process when metal parts are joined together by the application of heat, pressure, or a combination of both?

Задание 5. Прочитать текст «Сталь» и ответить на вопросы (не менее 3 ответов):

The most important metal in industry is iron and its alloy — steel. Steel is an alloy of iron and carbon. It is strong but corrodes easily through rusting, although stainless and other special steels resist corrosion. The amount of carbon in steel influences its properties considerably. Steels of low carbon content (mild steels) are quite ductile and are used in the manufacture of sheet iron, wire and pipes. Medium-carbon steels containing from 0.2 to 0.4 per cent carbon are tougher and stronger and are used as structural steels. Both mild and medium-carbon steels are suitable for forging and welding. High-carbon steels contain from 0.4 to 1.5 per cent carbon, are hard and brittle and are used in cutting tools, surgical instruments, razor blades and springs. Tool steel, also called silver steel, contains about 1 per cent carbon and is strengthened and toughened by quenching and tempering.

The inclusion of other elements affects the properties of the steel. Manganese gives extra strength and toughness. Steel containing 4 per cent silicon is used for transformer cores or electromagnets because it has large grains acting like small magnets. The addition of chromium gives extra strength and corrosion resistance, so we can get rust-proof steels. Heating in the presence of carbon or nitrogen-rich materials is used to form a hard surface on steel (case-hardening). High-speed steels, which are extremely important in machine-tools, contain chromium and tungsten plus smaller amounts of vanadium, molybdenum and other metals.

Ответить на вопрос:

What kinds of steel do you know?

Задание 6. Сопоставьте элементы с соответствующими значениями:

carbon	углерод
tungsten	вольфрам
nitrogen	азот
silicon	кремний
manganese	марганец

The fires can be divided into two categories. One category is fire incidents which involve only one vehicle without any involvement or influence from other vehicles at ignition. The list of tunnel incidents shows that these kinds of fires develop relatively slowly if there is no other special factor which may accelerate the progress, such as fuel leakage or explosion of cargo. They are initially small and show some sign of fire, such as smoke and flames, so neighbouring vehicles can see what is happening and prepare for the emergency within a reasonable time. The other category is fire incidents which involve more than one vehicle at the start of the fire and occur as a result of traffic incidents such as a collision between vehicles or between a vehicle and the wall of the tunnel. (для A1) These kinds of fires are expected to occur suddenly without any previous signs so they may cause panic in tunnel users and have the potential to develop into a catastrophic fire. In this study, the former category is named "Single fires" and the latter "Collision fires". Among the 69 fires in road tunnels that were analysed, 48 (69.6 %) were single fires and 21 (30.4 %) cases were collision fires. (для A2)

The two categories can be divided into sub-categories depending on whether the fire spreads or not. In this study, fire spread means that the fires propagated to another vehicle which is not engaged in the initial fire.

The reason for focusing on the fire spread is that it is one of the key factors determining the consequences of fires. The spread of fire increases the intensity and size of the fire and hampers the operations of the fire brigade. It also involves more vehicles and tunnel users so it can potentially claim many casualties and economic losses. (для B1)

Sample Answer

Пожары можно разделить на две категории. Одна категория – это пожары, в которых участвует только одно транспортное средство без какого-либо участия или влияния других транспортных средств при возгорании. Перечень происшествий в туннелях показывает, что эти виды пожаров развиваются относительно медленно, если нет других особых факторов, которые могут ускорить развитие, таких как утечка топлива или взрыв груза. Первоначально они небольшие и имеют некоторые признаки пожара, такие как дым и пламя, поэтому соседние автомобили могут видеть, что происходит, и подготовиться к чрезвычайной ситуации в разумные сроки. Другая категория — это пожары, в которых задействовано более одного транспортного средства в начале пожара и которые происходят в результате дорожно-транспортных происшествий, таких как столкновение между транспортными средствами или между транспортным средством и стеной туннеля. (для A1) Ожидается, что такие пожары возникнут внезапно без каких-либо предшествующих признаков, поэтому они могут вызвать панику у пользователей туннеля и могут перерасти в катастрофический пожар. В данном исследовании первая категория называется «Одиночные пожары», а вторая — «Встречные пожары». Из 69 проанализированных пожаров в автодорожных туннелях 48 (69,6 %) были одиночными, а 21 (30,4 %) — встречными. (для A2).

Две категории можно разделить на подкатегории в зависимости от того, распространяется ли огонь или нет. В этом исследовании распространение огня означает, что огонь распространился на другое транспортное средство, которое не участвовало в первоначальном возгорании.

Причина сосредоточения внимания на распространении огня заключается в том, что он является одним из ключевых факторов, определяющих последствия пожаров. Распространение огня увеличивает интенсивность и размер пожара и затрудняет работу пожарной команды. В нем также задействовано больше транспортных средств и пользователей туннелей, поэтому потенциально он может привести к многочисленным жертвам и экономическим потерям. (для B1).

WorldSkills organises the world championships of vocational skills, and is held every two years in different parts of the world. The organisation, which also hosts conferences about vocational skills, describes itself as the global hub for skills. WorldSkills brings together young people, industry, government, education, and institutions, to promote the benefits of and need for skilled trade professionals. The aims of the competition include demonstrating the advantages of learning a vocational skill, and encouraging 'parity of esteem' between vocational and academic qualifications. At the most recent event, WorldSkills Abu Dhabi 2017, there were competitions in 51 skills areas with close to 1,300 young people taking part. WorldSkills Abu Dhabi 2017, took place

between 15 and 18 October 2017 at Abu Dhabi, United Arab Emirates. The next WorldSkills Competition will be held in Kazan, Russia in 2019.

WorldSkills currently has 79 Member countries and regions, most of which organise national skills competitions that help to prepare the workforce and talent of today for the jobs of the future. WorldSkills International, formerly known as the International Vocation Training Organisation (IVTO), was founded in the 1940s and emerged from a desire to create new employment opportunities for young people in some of the economies that were devastated by the Second World War.

GENERAL NOTES ON THE WSSS. The WSSS specifies the knowledge, understanding, and specific skills that underpin international best practice in technical and vocational performance. It should reflect a shared global understanding of what the associated work role(s) or occupation(s) represent for industry and business (www.worldskills.org/WSSS). The skill competition is intended to reflect international best practice as described by the WSSS, and to the extent that it is able to. The Standards Specification is therefore a guide to the required training and preparation for the skill competition. In the skill competition the assessment of knowledge and understanding will take place through the assessment of performance. There will only be separate tests of knowledge and understanding where there is an overwhelming reason for these. The Standards Specification is divided into distinct sections with headings and reference numbers added. Each section is assigned a percentage of the total marks to indicate its relative importance within the Standards Specification. This is often referred to as the “weighting”. The sum of all the percentage marks is 100. The Marking Scheme and Test Project will assess only those skills that are set out in the Standards Specification. They will reflect the Standards Specification as comprehensively as possible within the constraints of the skill competition. The Marking Scheme and Test Project will follow the allocation of marks within the Standards Specification to the extent practically possible. A variation of five percent is allowed, provided that this does not distort the weightings assigned by the Standards Specification.

1. Education in Russia.

Our educational system is not very complex. It is divided into three stages: preschool education, secondary education and higher education. Each of them has its own peculiarities.

The preschool education is provided by nursery schools and it depends upon the parents to send their children or not. There children learn the fundamentals of reading, writing, counting.

There are different types of secondary schools: general secondary, technical schools, and vocational schools.

Every boy or girl must get secondary education. They go to school at the age of six or seven and must stay there until they are 14-17 years old. At schools pupils study academic subjects, such as Russian, Literature, Mathematics, History, Biology, a foreign language and other.

Higher education in our country is available to those having secondary education who have passed entrance examinations. Most colleges, universities and institutes are state ones, but there are also private colleges. They train specialists in different branches of science and technology.

Most higher schools have their own hostels and living and recreation complexes for students.

Our educational system is in the process of perfection to meet the requirements of our developing economy.

Our enterprises work in close collaboration with foreign enterprises of the same field and carry out the exchange of specialists.

2. Construction Worker

A construction worker is a person who works in the construction industry. They are responsible for building, repairing, and maintaining various types of buildings and structures, including homes, offices, bridges, and roads. Construction workers may work on a variety of projects, from small-scale renovations to large-scale construction sites.

Construction workers use a variety of tools and equipment to perform their jobs, including hand tools like hammers, saws, and screwdrivers, as well as power tools like drills, saws, and jackhammers. They may also use heavy equipment like cranes, bulldozers, and excavators to move materials and perform tasks like digging trenches and pouring concrete.

In addition to technical skills, construction workers need to have strong physical stamina, as their jobs can be physically demanding and require them to work in challenging conditions. They also need to have strong teamwork and communication skills, as they often work in teams and need to coordinate their activities with other workers on the job site.

3. WELDING

Welding is a process when metal parts are joined together by the application of heat, pressure, or a combination of both. The processes of welding can be divided into two main groups:

- pressure welding, when the weld is achieved by pressure and
- heat welding, when the weld is achieved by heat

Heat welding is the most common welding process used today.

Nowadays welding is used instead of bolting and riveting in the construction of many types of structures* including bridges, buildings, and ships. It is also a basic process in the manufacture of machinery and in the motor and aircraft industries. It is necessary almost in all productions where metals are used.

The welding process depends greatly on the properties of the metals, the purpose of their application and the available equipment. Welding processes are: classified according to the sources of heat and pressure used: gas welding, arc welding, and resistance welding. Other joining processes are laser welding, and electron-beam welding.
